

Somanaboina Nandish

✉ nandish.s22@iiits.in | 📞 +91 9502586177 | 🐙 GitHub | 🔗 LinkedIn | 🚀 LeetCode

Summary

Motivated backend developer with a strong foundation in computer science, proficient in **Python, Node.js, FastAPI, Flask**, Passionate about building scalable APIs, AI-powered backend systems, and efficient real-world applications.

Education

Indian Institute Of Information Technology Sri City

Oct 2022 – Jun 2026

B.Tech in Computer Science and Engineering

Experience

Akiyam Solutions Private Limited

Mar 2026 – Present

AI Engineer Intern (Ongoing)

- Working on developing and optimizing **AI/ML pipelines (MCP pipeline)** for real-world applications. Performing **data preprocessing, feature engineering, and model integration** to improve pipeline efficiency.
- Gaining hands-on experience in **end-to-end AI system development** and deployment workflows.

Projects

AI Study Assistant (RAG-based GenAI System) | FastAPI, LangChain, FAISS, Gemini API, HTML, CSS, JS Github
Built a full-stack **AI Study Assistant** using FastAPI and LLMs (Gemini API), enabling real-time question answering with personalized explanations.

Designed and implemented a **Retrieval-Augmented Generation (RAG)** pipeline using LangChain and FAISS, processing **500+ document embeddings** and improving answer relevance by **40%**.

Developed **AI-powered quiz generation and chat history modules**, exposing RESTful APIs (/ask, /upload, /quiz) and integrating with a responsive frontend.

Agromart – Backend System (Node.js, Express.js, MongoDB, JWT, Docker) (2025) **Demo | Github**
Developed a full-stack grocery marketplace with cart logic, vendor-based inventory, subscription plans, and **4+** dashboards.

Implemented **5+** backend APIs with **Node.js/Express**, **Dockerized** services, and deployed scalable containers on **Render**.

Collaborated on backend **API testing** using **Jest** and Supertest, ensuring reliability across **15+ workflows**.

Real-Time Low-Latency Framework – Cloud (2025) **Github**
Built OptimaCore, a real-time Azure framework using **4** services, achieving **<50 ms** latency and **45.2 ms** response time at **10k RPS**.

Delivered **81.6%** performance improvement, **19%** cost reduction, **99.12%** transaction success rate, and **82%** peak CPU utilization.

Designed a modular, API-driven system supporting **3+** frontend frameworks, with planned optimisations including caching, protocol tuning, and ML-based resource allocation. And published a research paper at **ECC IIT Hyderabad**

Skills

Programming Languages: Python, JavaScript, SQL, Java

Backend Development: Node.js, Express.js, FastAPI, Flask, REST APIs, Authentication, API Integration, Middleware, Microservices

Databases & Tools: MongoDB, MySQL, Redis, FAISS, Git, GitHub, Postman, Docker

Backend Concepts: Caching, Rate Limiting, Indexing, Database Optimization, Session Management, Scalable System Design

AI & GenAI: LangChain, LLMs, RAG, Prompt Engineering, Embeddings, Vector Databases

Web & Cloud: HTML, CSS, JavaScript, React.js, AWS, GCP, Render

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Achievements & Certifications

Oracle Cloud Infrastructure 2025 — AI Foundations & Generative AI
Scored **78%**; in Oracle AI/ML certifications, covering **6+ OCI AI services**, LLMs, embeddings, RAG and vector DBs; **Certificate**
Demonstrated hands-on with **fine-tuning & deploying Generative AI Models using OCI AI Labs and Services**.

LeetCode — 250+ Problems Solved
Completed **180+ coding problems** in Java — Arrays, HashMaps, Greedy and DP.
